DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 24-28, 33, 35, 43, 46, 49, 52, 55, 58 drawn to external electrodes comprising a mesh structure.

Group II, claim(s) 29-32, 34, 44, 47, 50, 53, 56, 59 drawn to specific electrode materials.

Group III, claim(s) 37-42, 45, 48, 51, 54, 57, 60 drawn to specific electrode arrangement.

2. The inventions listed as Groups I, II and III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Groups II and III do not require the mesh structure of Group I. Group I does not require the specific amounts of silver in the electrodes as claimed in Group II. Group III claims a variable concentration of silver in the as main component of the electrode (conductive materials).

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
